	Examiner Name		
Title: "CYSTIC FIBROSIS TRANSMEMBRANE CONDUCTANCE REGULATOR PROTEIN INHIBITORS AND USES THEREOF"			

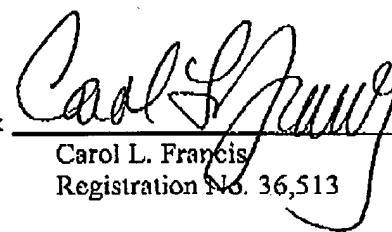

Sir:

The Commissioner of Patents has issued a filing receipt for the above-identified patent application that has been found to contain errors in the 'Domestic Priority' section. Please update the filing receipt as reflected on the Supplemental Application Data Sheet.

Applicant respectfully requests that the Commissioner issue a corrected Official Filing Receipt.

If for any reason a fee is found to be necessary, the Commissioner is authorized to charge such fee to Deposit Account No. 50-0815.

Respectfully submitted,
BOZICEVIC, FIELD & FRANCIS LLP

Blackish material

I am putting two platinum wires connected to a 30DC power supply in bath of carbonated water and letting the Hydrogen one(the one that bubbles the most) bubble into a upside down container full of carbon dioxide. I keep refilling the container by either adding more carbon dioxide or adding more carbonated water and letting it bubble into the container. After about a week or so, seems to help if I add propane but not sure, I get a blackish material in the bath sides, it burns when dried, possible fungus.

I call this process carbon dioxide hydrogenation
